DETAILED ACTION

1. The following is a Notice of Allowability upon examination of the above-identified application on the merits. Claims 1-26 are pending in this application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott M. Day, Reg. No. 52,801 on 23 February 2005.

The application has been amended as follows:

IN THE CLAIMS:

Claim 1, lines 10 and 13; deleted "the controller" and inserted --the proportional gain and integral time controller--.

Claim 6, line 2; deleted "tune band" and inserted --tune noise band--.

Claim 9, line 3; deleted "the controller" and inserted --the proportional gain and integral time controller--.

Claim 10, lines 10 and 13; deleted "the controller" and inserted --the proportional gain and integral time controller--.

Claim 15, line 2; deleted "tune band" and inserted --tune noise band--.

Claim 18, line 3; deleted "the controller" and inserted --the proportional gain and integral time controller--.

Claim 19, lines 8-9; deleted "tune band" and inserted --tune noise band--.

Claim 19, lines 11 and 14; deleted "the controller" and inserted --the proportional gain and integral time controller--.

Claim 20, line 3; deleted "the controller" and inserted --the proportional gain and integral time controller--.

Claim 22, lines 1-2; deleted "the controller" and inserted --the proportional gain and integral time controller--.

REASONS FOR ALLOWANCE

3. Claims 1-26 are allowed.
4. The following is an examiner's statement of reasons for allowance:

As per claim 1, the prior art of record taken alone or in combination fails to teach determining if control output and process output are oscillating quickly based on predefined criteria and adjusting the gain used by the proportional gain and integral time controller if the control output and process output are oscillating quickly.

As per claim 10, the prior art of record taken alone or in combination fails to teach means for determining if control output and process output are oscillating quickly based on predefined criteria and means for adjusting the gain used by the proportional gain and integral time controller if the control output and process output are oscillating quickly.

As per claim 19, the prior art of record taken alone or in combination fails to teach determining a new gain and a new integral time and setting the gain and integral time of the proportional gain and integral time controller to the new gain and new integral time if the pattern is not insignificant and the control output is not saturated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled

"Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

5. The examiner is considering the information disclosure statements (IDS) submitted on 06 October 2003.

Drawings

6. Formal drawings in compliance with 37 CFR 1.121(d) are required in this application. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

7. Inasmuch as the words "improved," "improvement of," and "improvement in" are not considered as part of the title of an invention, these words should not be included at the beginning of the title of the invention and will be deleted when the

Office enters the title into the Office's computer records, and when any patent issues.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
